

**EXECUTION OF PREPARATORY WORKS ON THE ARRANGEMENT OF THE  
CONSTRUCTION SITE FOR THE CONSTRUCTION OF THE NEW UNIVERSITY  
CHILDREN'S HOSPITAL TIRŠOVA 2 IN BELGRADE (PROCUREMENT NO.  
IOP/53-2021/UCH2)**

**Clarification no. 1**

**Issued on June 08, 2021**

Regarding the list of questions that the Employer, Public Investment Management Office Belgrade, No. 11 Nemanjina street, has received from the potential bidders, concerning the procurement procedure: Execution of preparatory works on the arrangement of the construction site for the construction of the new university children's hospital Tiršova 2 in Belgrade no. IOP/53-2021/UCH2, we give you the following answers:

**Question 1:**

According to available data, part of the future public access road is to be cut in the limestone zone. Will future contractor be allowed to use dynamite – industrial explosive for controlled mining, respecting any local normatives on security when using explosive materials for industrial / mining purposes?

**Answer 1:**

*Having in mind that the works will be performed on the location that is part of the existing hospital complex, as well as near the infrastructure facilities, the application of dynamite - industrial explosive for controlled mining, will not be allowed. Furthermore, the design of preparatory works also does not envisage that method of excavation.*

**Question 2:**

If yes, is the future contractor allowed to use its own staff and its subcontractors specialized in usage of dynamite, industrial explosive, coming from abroad, or there is any kind of restriction and obligation to use only local companies and their staff authorized for handling industrial explosives for mining?

**Answer 2:**

*See answer to question no. 1.*

**Question 3:**

Tender foresees different figures as Key Personnel, with specific local licenses issued by the Chambre of Engineers of Serbia. We followed the instruction to read the rules, and we understood that it is quite difficult, almost impossible, to qualify our international staff. Can you please clarify whether engineers coming from the Region

of former Yugoslavia (i.e. Bosnia-Herzegovina, Croatia, Montenegro and Slovenia) can be directly qualified and whether their licenses issued by the Chambers of Engineers of respective countries successors of Yugoslavia would be recognized as valid?

**Answer 3:**

Pursuant to the provisions of the Tender Documentation, the selected bidder will have to provide responsible contractors before signing the contract, who will have professional licenses issued by the relevant body of the Republic of Serbia. Namely, the Tender Documentation, in the part of 3.2 Qualification Criteria under point 2. Personnel Capabilities, prescribes the following:

“In accordance with the Law on planning and construction RS ("Official gazette RS", br. 72/2009, 81/2009, 64/2010 - decision 24/2011, 121/2012, 42/2013 - decision 50/2013 - decision 98/2013 - decision 132/2014, 145/2014, 83/2018, 31/2019, 37/2019 - other law and 9/2020) all engaged staff must hold licenses issued by relevant authorities of the Republic of Serbia valid.

In the case of a foreign Bidder, such Bidder shall, in the event of being awarded contract, engage persons holding licenses issued by relevant authorities of the Republic of Serbia, before the date of the contract conclusion.

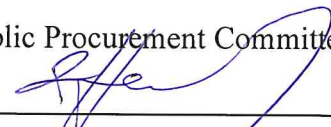

Please note that the General conditions of the contract (Red Fidic) clause 1.6 Contract Agreement, stipulates that the contracting parties will conclude a contract agreement within 28 days after the contractor receives the Letter of Acceptance.

In this regard, in case the foreign bidder to whom the contract has been awarded, does not engage persons who hold licenses issued by the relevant bodies of the Republic of Serbia, until signing the contract, the Contracting Authority will conclude a contract with the first next ranked bidder.

The procedure for licenses issuing is described on the Serbian Chamber of Engineers web site <http://www.ingkomora.org.rs/licence/> and <http://www.ingkomora.org.rs/eng/licences/>.”

Accordingly, engineers from the former Yugoslav republics are not exempt from the abovementioned rule.
