Infrastructure	36
Construction of bridges	40
Flood-prevention infrastructure	54
Remediation of Stolice mine tailing landfill	58
Procedure for allocating aid to beneficiaries	62
List of all implemented local infrastructure projects funded from the Solidarity Fund	66

INTRODUCTION

The damage of devastating floods that hit Serbia in May 2014 has been estimated at more than €1.7 billion. The death toll from flooding reached 57, while approximately 32,000 people were evacuated from their homes, 25,000 of them from Obrenovac.

119 municipalities, i.e. two thirds of the entire country, have been affected by the floods and landslides that occurred in the aftermath, which makes the 2014 floods the worst natural disaster in Serbia's history.

In response to the catastrophic flooding, the Government of the Republic of Serbia declared a state of emergency across its entire territory. At the same time, in order to ensure that government's response to the disaster was as effective as possible, assistance was sought from the international community, primarily from the governments of EU member states, EU candidate countries from the region, the United Nations and the Russian Federation. A request made to the European Commission was later also put in to all the other participating states of the EU Civil Protection Mechanism.

The cost of reconstruction amounted to over €400 million. More than half of that sum has been funded from donations, primarily from the European Union in the amount of €162.2 million.

In the wake of the floods, the Serbian Government set up the Office for Reconstruction and Flood Relief (currently the Public Investment Management Office), which has played a major role in coordinating donations and reconstruction efforts after the floods.

Over the previous two years, nearly 500 families affected by the floods have been given a roof over their heads. More than 21,000 families have received financial aid exceeding €42 million in total. Also, financial and/or in-kind assistance has been given to more than 2,000 small and medium-sized enterprises and entrepreneurs as well as to over 26,000 farmers. Works on reconstruction and improvement of flood protection infrastructure in excess of €27 million have been carried out at more than 300 sites across Serbia. The electric power system has been restored, which is why, despite an estimated €0.5 billion in damage suffered by this sector, Serbia did not have power blackouts even for a single day.

EUROPEAN UNION GRANTED €60.2 MILLION FROM ITS SOLIDARITY FUND

EU SOLIDARITY FUND RELIEF

On March 13, 2015, the European Union granted €60.2 million from its Solidarity Fund (EUSF) to help Serbia as the most severely flood-affected country in the region.

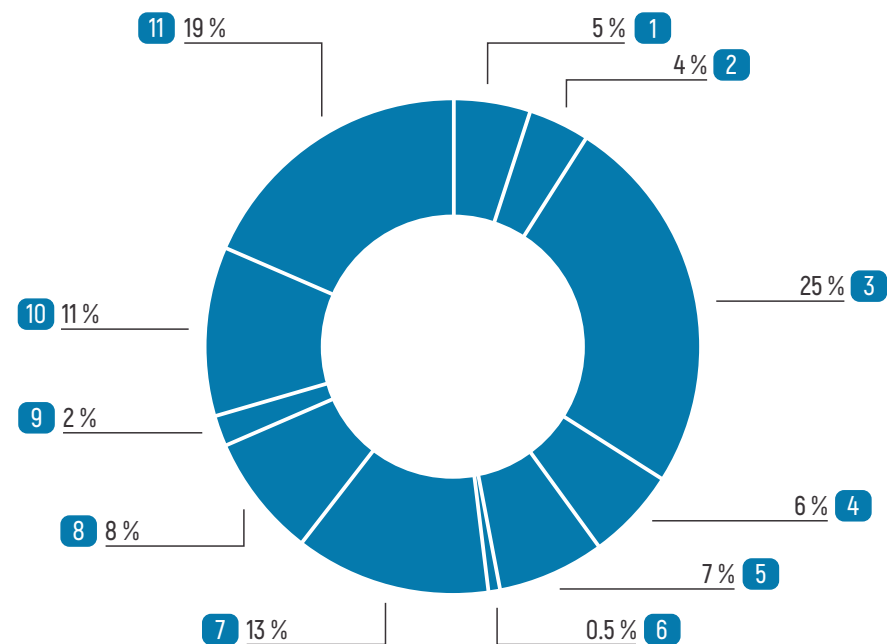

The aid was earmarked for covering and/or reimbursing extraordinary expenses for public works, primarily to restore critical infrastructure, repair the direct damage and address the pressing needs in the aftermath of the floods, as well as the expenses of rescue operations and the clean-up of the affected areas. The funds could also be used retroactively, i.e. for already launched recovery and reconstruction projects, as well as for reimbursement of already incurred expenses.

Projects funded from the EUSF grant have been implemented in 72 local self-governments (LSG).

The aid received from the Solidarity Fund was used to finance:

- Construction of 73 completely new bridges in 28 LSGs;
- Implementation of projects aimed at reconstruction and improvement of local infrastructure, namely:
 - ✓ 13 reconstruction and improvement projects for sewage and water supply systems in 12 LSGs,
 - ✓ Rehabilitation of 29 landslides in 14 LSGs,
 - ✓ 14 projects of local watercourse regulation in ten LSGs,
 - ✓ 8 projects of reconstructing local roads;
- Implementation of 59 projects to reconstruct public facilities in healthcare and education sectors in 23 LSGs;
- Construction and improvement of flood-prevention infrastructure by building and reconstructing 202 structures managed by public water management companies (PWMC) Srbijavode and Beogradvode.

As of October 15, 2016, a total of €60,224,605 has been received from the EUSF. More details are given in the table below.

1. To suppliers of Srbijavode and Beogradvode and refunded from the Solidarity Fund	€3,224,696
2. For PwMC "Beogradvode"	€2,608,307
3. For suppliers of PwMC "Srbijavode"	€15,235,818
4. For Electric Power Industry of Serbia	€3,425,987
5. For Public Enterprise Roads of Serbia	€4,055,257
6. For the Ministry of Interior	€343,860
7. For municipalities	€8,032,170
8. For Republic Water Directorate	€4,668,967
9. For Serbian Railways	€1,070,148
10. For building bridges	€6,439,314
11. For construction of public facilities	€11,120,081
TOTAL	€60,224,605

RECONSTRUCTION OF PUBLIC BUILDINGS

Financial aid received from the EUSF has been used to finance reconstruction of

59 public buildings in

23 municipalities

cost of reconstruction has exceeded

€5.7 million

Financial aid received from the EUSF has been used to finance reconstruction of a total of 59 public buildings in 23 LSGs. The cost of reconstruction has exceeded €5.7 million and encompassed a total reconstruction of old or the construction of new facilities (such as schools, day-care centres, health centres and outpatient care clinics).

The programme involved the rehabilitation of 34 schools, 2 day-care centres, 12 health centres and 11 outpatient care clinics.

LSGs in which the reconstruction of devastated facilities has been undertaken include: Ub, Valjevo, Svilajnac, Kragujevac, Paraćin, Smederevska Palanka, Koceljewa, Mladenovac, Grocka, Mionica, Kraljevo, Petrovac na Mlavi, Ljubovija, Kosjerić, Krupanj, Lazarevac, Loznica, Ljig, Kučevo, Vladimirci, Smederevo, Lučani and Trstenik.

BEGALJICA

OUTPATIENT CARE CLINIC

Municipality of Grocka

As one of the most severely damaged facilities, the Outpatient Care Clinic in Begaljica was out of service after the floods. During the flooding, water penetrated into the building and reached the height of 50 cm, remaining for several days and completely overflowing the boiler room. Due to water retention, walls absorbed the moisture, which rose up the walls as a result of capillary action. After accessing the building and removing the floor, it was observed that the plumbing and sanitation systems had been completely ruined.

This project worth €86,000 encompassed the restoration of walls and joinery, floors, the façade, the plumbing and sanitation systems and sanitary blocks.

Facilities before the reconstruction

PLAVI ZEC

DAY CARE CENTRE

Municipality of Paraćin

Following the May 2014 floods, Plavi Zec Day Care Centre in Paraćin had to reduce its capacity but kept its doors open despite significant after-effects of the flooding. During the flooding, the slabs in classrooms had fractured and water that penetrated under the building due to subsidence led to cracked walls and a collapsed roof structure. The kitchen, which was used for preparing food for all kindergartens in Paraćin, was completely flooded and therefore out of service.

This project of reconstructing the day care centre worth €130,000 encompassed a complete renovation of the building. Thanks to the EU donation, floors, walls, mechanical and electric installations, façade, joinery, the roof, sanitary block, the kitchen and the dining hall have all been fully restored. Today, Plavi Zec Day Care Centre can finally function in its full capacity and accommodate 202 children from Paraćin.

Facilities before the reconstruction

MILAN RAKIĆ

PRIMARY SCHOOL IN DUČIĆ

Municipality of Mionica

All the premises in "Milan Rakić" Primary School in Dučić were flooded when the water level reached a height of 30 cm. Due to water retention, the walls absorbed moisture, which rose up the walls as a result of capillary action. Strong gusts of wind caused damage to roof tiles, which led to the collapse of the roof structure.

This reconstruction project worth around €35,000 has included the total rehabilitation of the building. The walls, floors, façade, joinery and the roof structure have all been completely repaired.

Facilities before the reconstruction

SECONDARY SCHOOL OF ECONOMICS, COMMERCE AND MECHANICAL ENGINEERING

Municipality of Kučevo

Due to the rise in the level of groundwater, the school's basement premises had been flooded; water reached the height of 33 cm and remained in the building for three days. The boiler and some electrical installations had also suffered damage. As a result of strong gusts of wind and heavy rainfalls, gutters leaked and the façade and gutters were damaged. Water penetrated even through the windows and caused damage to the walls.

This reconstruction project has included the restoration of the façade, a replacement of the façade joinery and painting works. Total cost of works amounted to around €106,000.

Facilities before the reconstruction

VALJEVO

Construction of the Outpatient Care Clinic in the Village of Divci, Valjevo Health Centre

cost of works around €76,000

UB

Reconstruction of "Milan Munjas" Primary School

cost of works around €174,000

UB

Construction of the Primary School "Rajko Mihajlović" in Kalinovac Village

cost of works around €70,000

KOCELJEVA

Reconstruction of "Draginje" Outpatient Care Clinic

cost of works around €42,000

KOCELJEVA

Reconstruction of
"Veljko Vlahović"
Secondary School

cost of works around €186,000

KOSJERIĆ

Reconstruction of "Mito
Igumanović" Primary School

cost of works around €221,000

KOCELJEVA

Reconstruction of
"Donje Crniljevo"
Outpatient Care Clinic

cost of works around €46,000

KRUPANJ

Reconstruction of
"Bela Crkva"
Outpatient Care Clinic

cost of works around €36,000

KUČEVO

Rehabilitation of
"Ugrin Branković"
Primary School

cost of works around €16,000

LJIG

Reconstruction of
"1300 Corporals"
Secondary School

cost of works around €185,000

LAPOVO

Recovery of "Garevine"
water supply facility

cost of works around €69,000

LJUBOVIJA

Reconstruction of the
Secondary School

cost of works around €114,000

LOZNICA

Reconstruction of "Tekeriš"
Outpatient Care Clinic

cost of works around €31,000

SVILAJNAC

Reconstruction of the
Outpatient Care Clinic
in Kušiljevo

cost of works around €59,000

MIONICA

Reconstruction of
"Živojin Mišić"
Primary School in Rajković

cost of works around €225,000

SVILAJNAC

Reconstruction of the
Outpatient Care Clinic at the
Health Centre

cost of works around €153,000

TRSTENIK

Reconstruction of "Živadin Apostolović" Primary School - a satellite classroom in Bogdanje

cost of works around €50,000

VLADIMIRCI

Rehabilitation of a Health Clinic in Provo

cost of works around €10,000

LAZAREVAC

Reconstruction of "Dr Đorđe Kovačević" Health Centre in Veliki Crljeni

cost of works around €30,000

SVILAJNAC

Reconstruction of the Outpatient Care Clinic at the Health Centre

cost of works around €153,000

INFRASTRUCTURE

EUR 29.7 million from EUSF invested in reconstruction of infrastructure devastated by 2014 floods.

Of that amount, €8.6 million were used for the reconstruction of transport and local infrastructure, while 19,2 million were invested in rehabilitation of the damaged flood-prevention infrastructure, including retroactive financing of already implemented works. A considerable amount of €1.9 million has been earmarked for the rehabilitation of Stolice mine tailing landfill in Krupanj, which has been highlighted as an environmental hazard in a report issued by the World Bank, European Union and the United Nations.

Infrastructure projects have included:

- Construction and improvement of flood-prevention infrastructure by building and reconstructing 202 structures managed by PVMC Srbijavode and Beogradvode,
- 13 reconstruction and improvement projects for sewerage and water supply systems in 12 LSGs,
- Rehabilitation of 29 landslides in 14 LSGs,
- 14 projects to regulate local watercourses in 10 LSGs,
- 8 projects to reconstruct local roads,
- Construction of 73 new bridges in 28 LSGs.

Infrastructure projects have included:

202 flood-prevention infrastructure structures

13 sewerage and water supply systems

29 landslides rehabilitated

14 local watercourse regulation projects

8 reconstruction of local roads

73 new bridges constructed

KRAGUJEVAC

Rehabilitation of Vinjište landslide

cost of works around €214,000

KRUPANJ

Rehabilitation of Troska landslide on the road linking Krupanj and Kržava

cost of works around €314,000

CONSTRUCTION OF BRIDGES

73 new bridges have been built in 28 LSGs from the EUSF funds and more than €7.1 million have been allocated for these construction projects. Projects included both large and expensive bridges, as well as a number of smaller ones used by residents of certain villages to access their farms.

All bridges have been constructed in line with detailed designs and meeting all standards of resilience, in particular those related to engineering geology, land surveying, geotechnical engineering, hydrology, and transportation.

Bridge over the Resava River in the Village of Subotica, Municipality of Svilajnac

The bridge was damaged beyond repair during the May 2014 floods. A new three-span bridge has been designed as a frame structure made of reinforced concrete. It measures 44.6 meters long, including the wings, and 8.5 meters wide, with a 6 meter-wide pavement. Footpaths on both sides measure 1.25 meters wide each. The bridge crosses a local road which leads to the community of Subotica in the Svilajnac Municipality. The total cost of works amounts to around €320,000.

Bridge over the Lepenica River on the Mionica – Sanković road, Municipality of Mionica

The bridge was damaged beyond repair during the May 2014 floods. A new bridge has been designed and it has a single span of 8.5 meters. The bridge measures 12.5 meters long, including the wings, and 6 meters wide, with a 4 meter-wide pavement. Footpaths are 1 meter in width. The bridge spans a road leading to the Village of Sanković. The total cost of works amounts to around €103,000.

Bridge over the Jadar River on the Komirić - Bela Crkva road, Municipality of Osečina

The bridge was damaged beyond repair during the May 2014 floods. The flooding caused soil erosion under the foundation and the structure suffered extensive damage. A new three-span bridge has been designed. It measures 47.2 meters long, including the wings, and 7.8 meters wide, with a 5.5 meter-wide pavement. Footpaths are both 1.15 meter-wide. The bridge crosses a road which connects Komirić and Bela Crkva via Belotić. The total cost of works amounts to around €237,000.

Bridge over the Lipnica River on the Radobić - Sanković road, Municipality of Mionica

The bridge was damaged beyond repair during the May 2014 floods. A new bridge has been designed with a single span 10.5 meters. The bridge measures 14.5 meters long, including the wings, and six meters wide, with a 4-meter wide pavement. Footpaths are one meter wide. The total cost of works amounts to around €92,000.

TOPOLA

bridge over the Jasenica River,
Šatornja - Stragari road

cost of works around €323,000

LJIG

bridge over the Kačer River in Kozelj
local community (Baškalovići hamlet)

cost of works around €90,000

SVILAJNAC

footbridge near the bus station

cost of works around €110,000

LJIG

bridge over the Kačer River which
leads to Marjanovići hamlet in
Ivanovići local community

cost of works around €106,000

MALI ZVORNIK

bridge over the Radalj River
in Radaljska Banja

cost of works around €68,000

MIONICA

bridge over the Lepenica River,
Ključ - Rajković road

cost of works around €87,000

MIONICA

bridge over Duboki stream
in Gornji Lajkovac Village

cost of works around €70,000

MIONICA

bridge over the Lipnica River,
road through the Village of
Đurđevac

cost of works around €83,000

FLOOD-PREVENTION INFRASTRUCTURE

The cost of works executed in order to rehabilitate and reconstruct the flood-prevention infrastructure managed by Srbijavode and Beogradvode has exceeded €16 million. The funds have been used to repair the damaged flood-prevention infrastructure at 202 sites throughout Serbia.

KRUPANJ

Reconstruction of regulated bed of the Čadavica River flowing through Krupanj

cost of works around €86,000

OSEČINA

Reconstruction of regulated watercourse of the Jadar River in Osečina

cost of works around €45,000

NOVI PAZAR

Regulated riverbeds of the Raška and Jošanica Rivers which flow through Novi Pazar

cost of works around €133,000

SVRLJIG

Right-bank embankment of the Svrlijski Timok River

cost of works around € 13,000

Smederevska Palanka, Regulation and cleaning of the bed of the Ivak stream, cost of works around €162,000

Obrenovac, Reconstruction of the bed of the Barička River, cost of works around €262,000

REMEDIATION OF STOLICE MINE TAILING LANDFILL

Stolice mine tailing landfill is a structure in which mine waste is stored, or, more precisely, it is an old flotation tailings pond in which several hundreds of cubic meters of mine dumps, hazardous ore residue with high levels of arsenic, antimony and lead, have been deposited.

A decades-long issue of tailings spills from these flotation landfills of the antimony mines escalated in May 2014 when the pond's stability was compromised by heavy rainfall in the region. Since then, the tailings pond has been a source of the pollution of the Kostajnik, Korenita and Jadar Rivers. Hazardous substances, including metals, have been found in and around the beds of those three rivers.

The issue of tailings spillage is particularly underlined as an environmental hazard in a report issued by the World Bank, European Union and the United Nations after the floods of 2014.

Subsequent environmental research showed that the damaged caused by the flooding has pushed the pollution

levels well above permitted values along the length of approximately 27 km of riverbeds of the Kostajnička and Korenita Rivers, as well as in wide littoral areas, and that it was necessary to clean up the terrain and remove the deposited tailings pond sludge. Furthermore, sizeable areas of flooded agricultural land (some 360 ha) which had been contaminated by heavy metals were due for soil remediation.

On April 15, 2016, the Serbian Government adopted a Government Recovery Programme for Remediation of Contaminated Sites of Kostajnička, Korenita and Jadar Rivers, which provided for a two-stage remediation process. This project, which will have a major impact on environmental protection and the health of population includes the construction of an area for depositing 220,000 cubic meters of hazardous substances currently deposited at a surface area of 3.5 hectares.

The cost of works, which include the protection against surface waters, remediation and stabilization of the tailings pond, a clean-up and regulation of the most vulnerable section of the Kostajnička River downstream from the landfill in the settlements area amounts to around €1,9 million.

PROCEDURE FOR ALLOCATING AID TO BENEFICIARIES

Special rules related to procurements after natural hazards included in the Law on Public Procurement in 2015 apply to all procurement procedures which are part of the post-floods recovery process. These rules stipulate the use of a fully transparent and open model of public procurement, with shorter deadlines for the submission of bids (at least ten days).

Full transparency of public tender procurements has led to a considerable increase in the number of bidders (even up to 11). As a result of the larger number of bidders, contract prices of works have been 20 to 40 percent lower compared to detailed design estimates. As a result of these savings, more work has been done with the same amount of money.

All procedures and criteria for selecting projects have been reviewed by Transparency Serbia (Serbian branch of Transparency International) on two separate occasions and they came through with highest acclamations.

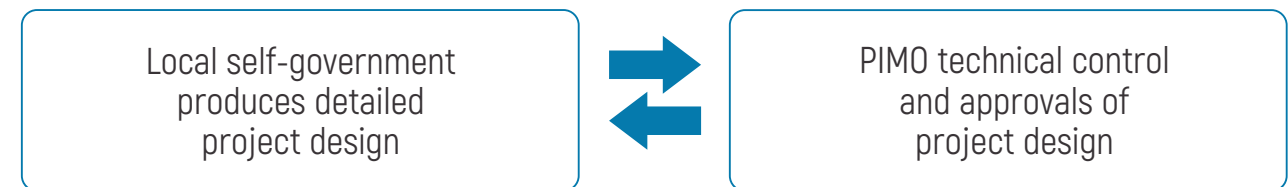

Basic eligibility criteria for selecting structures include:

1. Damage was caused by the floods or activated landslides which occurred in May 2014. (Protocols drafted by the competent authority on the report or assessment of damage, which are used to prove that structures were actually damaged in May 2014);
2. The structure is within the remit of a LSG;
3. The project has been included in programmes for the recovery of facilities for public use or bridges in accordance with the Law on Post-Flood Rehabilitation in the Republic of Serbia (Official Gazette of the RS, no. 75/14).
4. No funding has been provided from the budget of the relevant LSG, donations or other sources for the reconstruction or construction;
5. Due to damage, there has been an interruption or difficulties have been encountered in the provision of services (this refers to water supply, healthcare and educational facilities);
6. Due to damage, the use of a road or bridge has been prohibited or rendered more difficult.

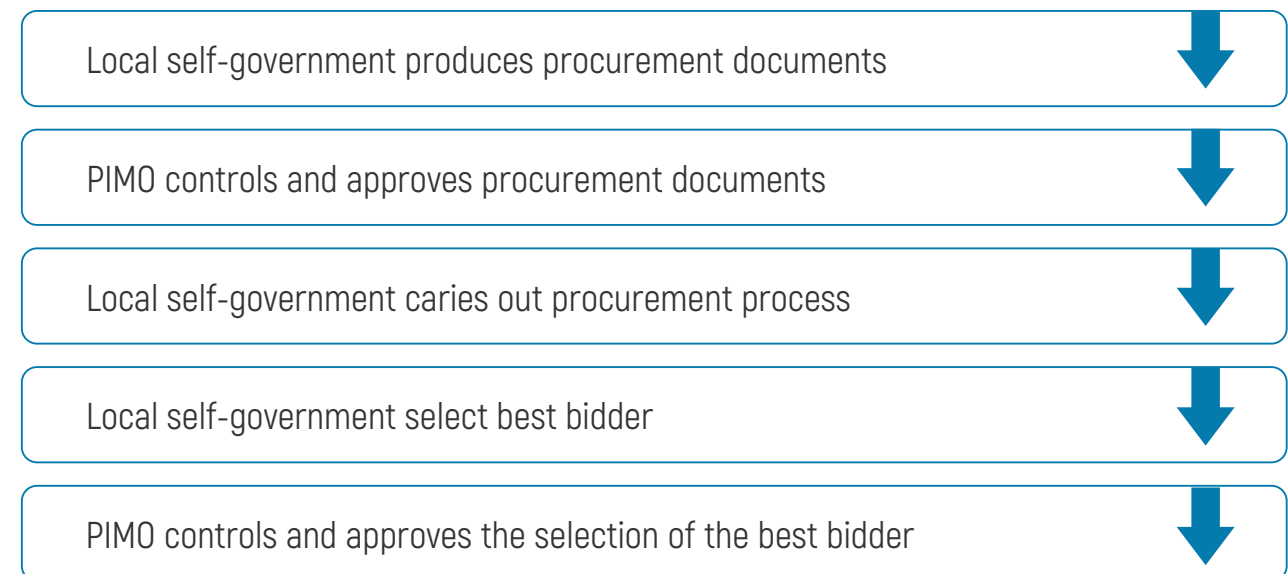

Selection of projects:

Preparation of project documentation:

Public Procurement Process:

After receiving an invoice, PIMO inspects and verifies the executed works and their cost and transfers a payment directly to the contractor.

LIST OF ALL IMPLEMENTED LOCAL INFRASTRUCTURE PROJECTS FUNDED FROM THE SOLIDARITY FUND

No.	Municipality	Facility	Cost of works in EUR
1.	Arilje	Construction of a bridge over the Moravica River, Virovo local community	€255,078
2.	Bajina Bašta	Landslide rehabilitation on a local road which links Ovčinska River and a school in Gvozdac, via Luke	€146,334
3.		Construction of a bridge over the Dobajevica River in Zaglave local community	€13,489
4.		Construction of a bridge over the Rača River	€19,352
5.	Belgrade - Grocka	Reconstruction of "Begaljica" Outpatient Care Clinic	€86,539
6.	Belgrade - Lazarevac	Construction of a bridge over the Lukavica River in Šopić local community situated near a future wastewater treatment plant	€75,934
7.		Construction of a bridge over the Lukavica River in Lukavica local community in the vicinity of the existing football pitch	€12,000
8.		First stage of Ula-8 well reconstruction in Nepričava	€297,789
9.		Reconstruction of "Dr Đorđe Kovačević" Health Centre in Veliki Crljeni	€29,738
10.	Belgrade - Mladenovac	Rehabilitation of water supply network in Kosmajaska Street	€73,445
11.		Reconstruction of "Sveti Sava" Primary School (first and second stage)	€186,678
12.	Belgrade - Obrenovac	Reconstruction of the bed of the Barička River	€261,649
13.		Reconstruction of water supply and sewerage network in Nemanjina Street	€89,206
14.	Valjevo	Construction of the Outpatient Care Clinic in the Village of Divci, Valjevo Health Centre	€76,806
15.		Landslide rehabilitation on the class 1-b state road no. 21, Valjevo - Kosjerić	€369,493
16.		Two landslides rehabilitation on the class 2-b state road no. 342, Valjevo (Iverak) - Karaula - Ub	
17.		Two landslides rehabilitation on the class 1-b state road no. 21, Valjevo - Kosjerić	€75,292
18.		Landslide rehabilitation on the class 2-b state road no. 121, Kosjerić - Požega, Kalenić (Zlatna dolina)	
19.		Construction of a bridge over the Obnica River leading to Veselinovići community in Valjevo	€186,305
20.		Reconstruction of Secondary Medical School	€169,857
21.	Varvarin	Landslide rehabilitation on a local road in the Village of Obrež	€30,830
22.		Landslide rehabilitation on a local road in the Village of Suvaja	€11,868

No.	Municipality	Facility	Cost of works in EUR
23.	Vladimirci	Repair of the road linking Banić crossroads and Velika Bara in Jalovik local community (relocation of a road section)	€300,517
24.		Rehabilitation of a hall of residence for primary and secondary school students	€64,787
25.		Rehabilitation of the Health Clinic in the Village of Provo	€9,696
26.		Rehabilitation of "Vladimirci" Health Centre - Children's Clinic	€13,698
27.		Construction of a bridge over the Višnjica River in Vukošić local community	€15,005
28.	Gornji Milanovac	Regulation and cleaning of the bed of the Backovac and Jakljevo streams	€228,890
29.		Construction of a bridge in Brđani	€173,431
30.		Construction of a bridge in Jablanica	€28,265
31.	Despotovac	Repair of the section of the road which runs through the Village of Bukovac	€40,427
32.	Knić	Repair of a bridge over the Konjušara River in Konjuša	€25,947
33.	Kosjerić	Water supply network in the Village of Cikote	€46,926
34.		Construction of a bridge over the Pološnička River leading to the hamlet of Dunjići	€19,507
35.		Reconstruction of "Mito Igumanović" Primary School	€221,307
36.		Rehabilitation of Health Centre	€64,068
37.	Koceljeva	Landslide and escarpment rehabilitation in Podgorska Street	€17,942
38.		Repair of a road and Rasnica riverbank	€120,375
39.		Construction of the BUSV-7 well with auxiliary equipment to ensure water supply	€137,020
40.		Construction of a bridge over the Tamnava River *(Zukve-Batalage)	€71,459
41.		Construction of a bridge over the Lukić Stream	€90,216
42.		Construction of a bridge over the River Rasnica, Koceljeva local community	€25,445
43.		Construction of a bridge over the Tamnava River spanning the road Šabac - Užička Požega	€535,275
44.		Construction of a bridge over the Tamnava River, a link between the class 2A state road no. 141 and the community of Mala Jelići	€148,873
45.		Construction of a bridge over the Ub River spanning the municipal road Družetić - Gola Glava	€136,067
46.		Reconstruction of "Veljko Vlahović" Secondary School in Koceljeva	€185,836

No.	Municipality	Facility	Cost of works in EUR
47.	Koceljeva	Reconstruction of the Primary School in Donje Crniljevo, Koceljeva	€81,829
48.		Reconstruction of "Donje Crniljevo" Outpatient Care Clinic	€46,306
49.		Reconstruction of "Draginje" Outpatient Care Clinic	€42,433
50.		Reconstruction of "Mića Stanojlović" Primary School in 3 Dositejeva Street - central primary school	€119,071
51.		Reconstruction of "Mića Stanojlović" Primary School in Svileuva - a satellite classroom	€41,943
52.	Kragujevac	Rehabilitation and cleaning of the Srebrenica riverbed	€375,368
53.		Rehabilitation and cleaning of the beds of the River Ždraljice and Šabovski Stream	€86,334
54.		Rehabilitation of Vinjište landslide	€214,596
55.		Construction of a bridge over the Bresnička River	€92,140
56.		Construction of a bridge over the Grošnica River in the vicinity of Grošnica local community	€142,529
57.		Reconstruction of the Polytechnic School (first and second stage)	€398,659
58.		Reconstruction of "Toza Dragović" School of Trade and Catering	€154,990
59.		Reconstruction of "Vuk Karadžić" Primary School	€161,933
60.		Reconstruction of "Third Battalion of Kragujevac" Primary School	€250,519
61.		Reconstruction of "Milutin and Draginja Todorović" Primary School - the main building	€200,389
62.		Reconstruction of "Milutin and Draginja Todorović" Primary School - a satellite classroom	€89,596
63.		Reconstruction of Second Grammar School in Kragujevac	€126,310
64.	Kraljevo	Water supply network for Adrani and Šeovac - two estates	€295,968
65.		Landslide rehabilitation on the class 1-b state road linking Kraljevo and Ušće located in Pivnica outside Bogutovačka Banja	€243,815
66.		Landslide rehabilitation on the class 2-a state road no. 181 which connects Drakčići and Pekčanica	
67.		Construction of a bridge over the Gledička River which spans the road Čukojevac - Godačica, a turning to Kokotovići	€331,884
68.		Construction of a bridge over the Gledička River, the hamlet of Donja reka - Pešići	

No.	Municipality	Facility	Cost of works in EUR
69.	Kraljevo	Construction of a bridge over the Gledička River, the hamlet of Donja reka, near the old watermill	
70.		Construction of a bridge over the Gledička River, "Žabin potok" - Jeremići	
71.		Construction of a bridge over the Gledička River in the centre of Godačica Village	€460,603
72.		Construction of a bridge over the Gledička River in the hamlet of Koturovići	
73.		Construction of a bridge over the Gledička River in the hamlet of Radonjići	
74.		Construction of a bridge over the Gledička River, a turning to the Village of Jovići	
75.		Construction of a retaining wall in the settlement of Koturovići	€118,304
76.		Reconstruction of "Dragan Marinković" Primary School	€69,405
