

Procurement of Medical Devices for Clinical Centre Dr Dragisa Misovic

IOP/6-2017/RD

Clarification No. 2

Issued on 8 September 2017

Question: I would like to ask you a question about procurement of the computer keyboards and mouse devices from Lot 8-ICT-Infrastructure:

8,2,1	Item 4 Thin Client (terminal desktop) with monitor
--------------	---

YU Keyboard and mouse, manufactured by the same manufacturer as the thin client- the mentioned specifications require that the mouse and keyboard in the bid are from the same manufacturer as the desktop computer.

Will you accept as appropriate the bid with a medical keyboard and mouse from another manufacturer (silicone, washable keyboards and mouse specially designed for the hospital environment)?

Answer: Due to the need for high compatibility of the system, it is necessary that the keyboard and mouse are from the same manufacturer as the desktop computer.
